

# LEGACY STREAMING COMMANDS

Twitch + YouTube quick start for Gridiron Legends

## FOR TEAM MEMBERS

You must already have an approved league team. Submit Twitch and YouTube separately if you use both platforms.

| COMMAND                                                                                  | WHAT IT DOES                                                                             |
|------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|
| <code>/requeststream platform:Twitch account:YourUsername</code>                         | Requests commissioner approval for your Twitch account. A Twitch channel URL also works. |
| <code>/requeststream platform:YouTube account:https://www.youtube.com/@YourHandle</code> | Requests commissioner approval for your YouTube channel.                                 |
| <code>/mystreams</code>                                                                  | Privately shows your registered accounts and the latest request status.                  |
| <code>/removestream platform:Twitch</code>                                               | Immediately removes your own Twitch account and cancels any pending Twitch request.      |
| <code>/removestream platform:YouTube</code>                                              | Immediately removes your own YouTube account and cancels any pending YouTube request.    |

## FOR COMMISSIONERS

| COMMAND                                                                          | WHAT IT DOES                                                                                            |
|----------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| <code>/setstreamchannel channel:#live-streams</code>                             | Chooses where qualifying live notifications are posted.                                                 |
| <code>/setauditchannel channel:#commissioner-audit</code>                        | Chooses where account requests and removal logs are posted.                                             |
| <b>Approve / Reject buttons</b>                                                  | Review a member's request inside the commissioner audit channel.                                        |
| <code>/registerstreams member:@Member twitch:Username youtube:YouTubeLink</code> | Directly registers one or both accounts for an approved team member. You can provide only one platform. |
| <code>/removestream member:@Member platform:Twitch</code>                        | Removes that member's selected platform and cancels its pending request.                                |

## WHEN WILL LEGACY ANNOUNCE A STREAM?

**Registered account + Live + title contains "Gridiron Legends" or "Legacy" = Announce**

Matching is case-insensitive, extra words are allowed, and each live session is announced only once.

|                                  |                                       |
|----------------------------------|---------------------------------------|
| <b>YES</b> Gridiron Legends STMH | <b>YES</b> LEGACY   Cowboys vs Eagles |
| <b>NO</b> Madden ranked games    | <b>NO</b> Another league matchup      |

Typical detection: Twitch checks about every 3 minutes. YouTube checks about every 16-18 minutes and may be delayed by YouTube search indexing. YouTube streams must be public.
